## Pedro Barrail will exhibit at Design Miami/Basel, in Switzerland

May 28, 2019

Paraguayan architect, artist and designer Pedro Barrail will be part of the most influential art and design event in the world: Design Miami / Basel. This will take place from June 10 to 16 in Basel (Switzerland) and in this context, the compatriot will present his new project together with other renowned artists.

This is the eighth time that Pedro Barrail has participated in Art Basel / Design Miami, and on this occasion he will travel to Basel to personally present his latest project and participate in the parallel events to the exhibition. “My works propose new paths that confront tradition and modernity. I was always interested in creating a dialogue between cultures and different aesthetic visions, in order to obtain new forms of expression”, commented Pedro Barrail.

Barrail is considered one of the pioneers in proposing the fusion of contemporary design with the tribal / artisan / ancestral art of Paraguay, a trend that is very much in vogue today in various design trends. In 2000, he presented his first collection of chairs, collaborating with Marciano Aquino, of the Pãi Tavyterã ethnic group (Pedro Juan Caballero), who captured his ancient carving technique on them.
